

Assistive Technology/Transportation Services

Assistive Technology is any piece of equipment or device that is used to increase the independence of an individual with a disability. These devices are used for working, playing, learning and living and include mobility aids, communication devices, computers, sports equipment and adaptive toys. The resources below have been listed with a short description of their primary services. Many times, if this resource is unable to serve you, they can refer you to an alternate resource, which can meet your needs.
