Family Support Network of North Carolina promotes and provides support for families with children who have special needs. Families are in a unique position to offer information and support to other families. An experienced family member can share the most practical advice and help a parent navigate the complex service system. Having support can make it easier for families to experience the joy and satisfaction that can come from parenting a child with special needs. This Parent-to-Parent support is available through local, affiliated Family Support Network programs across the state and through the Central Directory of Resources ([www.fsnn.org](http://www.fsnn.org)).

Fax: (919) 232-0091

[www.learningrx.com/raleigh](http://www.learningrx.com/raleigh)

LearningRx Brain Training **develops the brain's ability to process information more efficiently and effectively.** A certified cognitive skills trainer works one-on-one using hundreds of different brain activities that are both challenging and enjoyable. The mental activities develop many different cognitive skills, including long-term memory, short-term/working memory, attention (selective, sustained and divided), visual processing, auditory processing, processing speed, logic and reasoning. Our brain training programs help struggling learners and readers, mentally gifted people looking for a competitive edge, aging adults who want to stay mentally sharp, and those with traumatic brain injuries. The average person gains over 20 years growth across all skill areas (and over 3 years growth in the individual skills) in 12-32 weeks of training. We work with people ages 5 through Senior Adults. Affordable standardized

testing is the first step in our process to identify both strong and weak cognitive abilities. We offer a variety of financing options. Please call us to learn more about how we can change your life by developing your mental skills. LearningRx treats the cause and not the symptoms.

**NAMI North Carolina**
