

## Atlas Orthogonal Chiropractors

After a brain injury, normal CSF (cerebro-spinal fluid) and blood flow in the brain can be disrupted. The first cervical vertebrae (atlas), which is the top bone in your neck can become fixated and misaligned, limiting the normal nerve activation to the brain.

The primary goal is to adjust the skull and the spine (sacral, cranial, and atlas) to restore the normal position and motion, which, in turn, restores the fuel, blood, and nerve supply to the brain. Listed below are Atlas Orthogonal Chiropractic offices that work with brain injury and its related symptoms.
